

## DragonFlyBSD - Bug #106

### emacs dired mode no longer working

03/09/2006 05:48 PM - swildner

<b>Status:</b> Closed	<b>Start date:</b>

<b>Target version:</b>	
<b>Description</b>	
<p>Hi,</p> <p>I've noticed that from some point in, say, the last 1.5 weeks the directory edit mode of emacs no longer seems to work. When I try to open a directory it just kinda freezes like in an infinite loop.</p> <p>Here's a ktrace:</p> <p><a href="http://yoyodyne.ath.cx/tmp/emacs.ktrace">http://yoyodyne.ath.cx/tmp/emacs.ktrace</a></p> <p>It starts just after the dired-mode lisp code has been loaded. You'll notice the large number of "CALL break()" lines starting in line 201, only interrupted at the end by SIGHUP when I closed the ssh window.</p> <p>Can anyone figure out what's going wrong here from that?</p> <p>Sascha</p>	

### History

#### #1 - 03/09/2006 05:55 PM - steve.mynott

I see no issue with emacs dired using "emacs-nox11-21.4anb2" from pkgsrc running on 1.5.1-DEVELOPMENT.

Cheers Steve

Strange, those are the versions I'm running here, too.

Sascha

Is this fixed?

**#4 - 10/02/2006 07:53 PM - swildner**

Kinda fixed. This issue occurs only on one box I have. As soon as I upgrade it,  
I'll recheck.
