Description

Delete a big file from nohistory HAMMER directory and see machine to lock up after some time. It just doesn't crawl, it's locked up completely - machine even don't respond to ping. The time it's locked up depends on size of the file and speed of the machine. Deleting 10GB file on my laptop locks up machine for 30 seconds.

Hi,

It would be really interesting to see if this is still the case.

Cheers,
Antonio Huete
