

DragonFlyBSD - Bug #158

OpenSSL missing types.h include.

04/28/2006 10:34 AM - dragonfly

Status: Closed	Start date:

Description The openssl headers make use of "size_t" but <sys/types.h> is not included. I'm not sure where the correct place to add the header is but e_os2.h seems ok. The following code does not compile on DragonFly. <pre>#include <openssl/sha.h> int main() { return 0; }</pre> Regards Gary

Include them in the program first? This is an example of the typical
"let the programmer include what is needed first" philosophy.
I don't really like to hack OpenSSL for this.

Joerg

Ok. I'll modify the program.

Thanks

Gary
