:While running stress2 tests over night, udp & tty..

:

:I awoke to find the following dump on my leaf account;

:

:http://leaf.dragonflybsd.org/~evocallaghan/page_fault.7z

:

:Sorry, no test case.. I don't really understand this dump.

:

:Cheers,

:Edward.

I have moved these panics into your ~/crash/ directory.

Uh. What is a .7z ?

It's compressed archive just like rar or zip.

Suppose this is the package to install:

archivers/p7zip

Was this fixed? Can this be closed?

Cheers,

Edward.
