

## DragonFlyBSD - Bug #1957

### mirror-master.dragonflybsd.org offline

01/08/2011 04:13 PM - cberendt

<b>Status:</b> Closed	<b>Start date:</b>
<b>Priority:</b> Urgent	<b>Due date:</b>

<b>Target version:</b>	
<b>Description</b> rsync, http and ftp are not working on the mirror-master at the moment. I also can't reach the system via icmp. ftp.dragonflybsd.org seems to be offline, too. I think you now about this problem, but I didn't find an open issue in your bugsystem.  Setting priority to critical.  HTH, Christian.  % ping -c 1 mirror-master.dragonflybsd.org PING avalon.theshell.com (209.131.97.47) 56(84) bytes of data.  --- avalon.theshell.com ping statistics --- 1 packets transmitted, 0 received, 100% packet loss, time 0ms  % ping -c 1 avalon.dragonflybsd.org PING avalon.theshell.com (209.131.97.47) 56(84) bytes of data.  --- avalon.theshell.com ping statistics --- 1 packets transmitted, 0 received, 100% packet loss, time 0ms  % curl <a href="http://avalon.dragonflybsd.org/">http://avalon.dragonflybsd.org/</a> curl: (7) couldn't connect to host

Sorry, I totally meant to post about this. Avalon (which is the mirror-master) is being moved. It was a short-notice thing. We may be using this opportunity to upgrade it as well. For now it is offline. I don't have a timeframe for it coming back yet.

-Matt

Hi,

What's the news on this?

Cheers,  
Edward.

:Cheers,  
:Edward.

Avalon is currently in-transit back to the colo after being seriously upgraded with new drives and a SSD. It will probably be Monday before it is up again.

I know this is a bit of an inconvenience. The package sets are available on the mirrors. Package and snapshot building will resume next week. Upgrading Avalon now (mid-way between releases) is a pretty good time to do it despite the annoyance.

Something different needs to be done in the future in terms of the hostnames we ship in the makefiles, or the mirror organization, or a procedure for dns changes, or documentation of the mirrors, or something. We do not overtly document the procedures to switch mirrors for src/pkgsrc and besides, it should not have been necessary in this case. All of our users who do not know git have been unable to upgrade anything for the last week.

Sam
