Target version:			
Description			
<p>I'm not sure if I have failing hardware or what but my DragonFly BSD box keeps panicing. I've uploaded the core files to leaf.dragonflybsd.org/~joseph/crash/</p> <pre>uname -a: DragonFly hickory 3.5-DEVELOPMENT DragonFly v3.5.0.289.gb21c21-DEVELOPMENT #0: Tue Jun 4 15:10:33 EDT 2013 root@hickory:/usr/obj/usr/src/sys/X86_64_GENERIC x86_64</pre> <p>I've also included a dmesg.0.txt file on leaf.</p>
