DragonFlyBSD - Bug #2613

Distcc from DPorts is somewhat broken

Description

Hi there! I use distcc to parallel dports building to 2 DragonFly BSD
machines. The bad thing is that dports version of distcc itself is broken.

To solve this problem one must add old pkgsrc distcc patches to dports and
rebuild distcc again.

I am not sure if all patches are really needed, but this one (which
implements sendfile) is crucial:

http://gitweb.dragonflybsd.org/pkgsrcv2.git/blob/refs/heads/pkgsrc-2013Q1:/devel/distcc/patches/patch-ab

So I cp'd it to /usr/dports/devel/distcc/files/patch-src-sendfile.c and
distcc works now fine.

Can someone do the same in dports git repo?

Hi,

Apparently there is a solution for this.
Checking with caller.

Cheers,
Antonio Huete

Okay, the latest dports should have an equivalent fix for distcc.
You have to make deinstall; make clean; make install to get it.

In the future, the best place to report dports issues is:
https://github.com/DragonFlyBSD/DPorts/issues

We're trying to keep bugs@ about the operating system rather than ports/packages

John
