

## DragonFlyBSD - Bug #1535

### loader does not give any help for mount problems

09/27/2009 06:42 PM - corecode

<b>Status:</b>	Rejected	<b>Start date:</b>	
<b>Priority:</b>	Low	<b>Due date:</b>	
<b>Assignee:</b>	alexh	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
The loader on-line help does not cover any topic for troubleshooting/setting root mount parameters. This is especially bad when the mountroot prompt is broken. The loader help (for set, probably) should talk about vfs.root.mountfrom and its format.			

### History

#### #1 - 09/28/2009 07:22 AM - alexh

needs to be added to sys/boot/pc32/loader/help.i386 I guess. Can't take care of it now, but will do it if nobody steps up in the next week or so.

Cheers,  
Alex Hornung

- *Description updated*

- *Status changed from New to Rejected*

Actually the loader does have help on this, with "help set tunables".
