

## DragonFlyBSD - Bug #1536

### loader does not recognize disklabel64 in lsdev

09/27/2009 06:43 PM - corecode

<b>Status:</b> Closed	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>

<b>Target version:</b>	
<b>Description</b> Loader can not read disklabel64 when issuing lsdev. Instead it prints "FFS bad disklabel". Bad when trying to figure out how the disklabel looks like.

I don't have any disk with boot/loader and disklabel64. Can you please try the patch at <http://leaf.dragonflybsd.org/~alexh/biosdisk.diff> ?

It should add support for disklabel64 when printing partitions and also show hammer filesystems, which wasn't happening before.

Cheers,  
Alex Hornung
