Description	
Hi,	
fix some comments in ahci_cam.c:	
<pre>diff --git a/sys/dev/disk/ahci/ahci_cam.c b/sys/dev/disk/ahci/ahci_cam.c index e7bcc07..bad6b51 100644 --- a/sys/dev/disk/ahci/ahci_cam.c +++ b/sys/dev/disk/ahci/ahci_cam.c @@ -136,8 +136,8 @@ ahci_cam_attach(struct ahci_port *ap) /* * The state of the port has changed. * - * If at is NULL the physical port has changed state. - * If at is non-NULL a particular target behind a PM has changed state. + * If atx is NULL the physical port has changed state. + * If atx is non-NULL a particular target behind a PM has changed state. * * If found is -1 the target state must be queued to a non-interrupt context. * (only works with at == NULL). @@ -788,7 +788,7 @@ ahci_xpt_action(struct cam_sim *sim, union ccb *ccb) * probed. * * Calculate at and atx. at is always non-NULL. atx is only - * non-NULL for direct-attached devices. It will be NULL for + * NULL for direct-attached devices. It will be non-NULL for * devices behind a port multiplier. * * XXX What do we do with a LUN wildcard?</pre>	
Cheers, Johannes
