<b>Description</b>			
See <a href="http://bugs.dragonflybsd.org/issues/3031">http://bugs.dragonflybsd.org/issues/3031</a> . It was once broken. Then fixed by <a href="http://gitweb.dragonflybsd.org/dragonfly.git/commit/62dc643ef61b347c4c2e60ad9ea68dd766741c90">http://gitweb.dragonflybsd.org/dragonfly.git/commit/62dc643ef61b347c4c2e60ad9ea68dd766741c90</a> (and <a href="http://gitweb.dragonflybsd.org/dragonfly.git/commit/7d829069c0009b901fc3cac433685334a793947f">http://gitweb.dragonflybsd.org/dragonfly.git/commit/7d829069c0009b901fc3cac433685334a793947f</a> ).			
Since commit ee479021092456b32f018d8b9dc5d3e1f4fb9363, X hangs during startup (completely freezes, have to hard reset). I wonder if maybe commit 7d829069c0009b901fc3cac433685334a793947f was reverted too?			

## History

### #1 - 10/11/2017 02:16 AM - mneumann

- Status changed from New to Feedback

X11 starts when I uncomment "radeonkms\_load=YES" from rc.conf, i.e. when I start X11 without having loaded the radeon kms module already. BUT, chrome no longer works :( . But firefox seems to work again.

### #2 - 10/11/2017 02:44 AM - mneumann

- Status changed from Feedback to Closed

ok. chrome works when I pass --disable-gpu (which is not required with the new radeon drm driver).
