Description	
usr.bin/bc/tty.c:34]: (style) Suspicious condition (assignment + comparison); Clarify expression with parentheses. Source code is <pre>while ((ret = tcsetattr(0, TCSADRAIN, t) == -1) && errno == EINTR)</pre> Maybe better code <pre>while (((ret = tcsetattr(0, TCSADRAIN, t)) == -1) && errno == EINTR)</pre> dragonfly/usr.bin/bc/tty.c:44]: (style) Suspicious condition (assignment + comparison); Clarify expression with parentheses. Source code is <pre>while ((ret = tcsetattr(0, t) == -1) && errno == EINTR)</pre>
