

DragonFlyBSD - Bug #414

Small fix for omshell(1)

12/19/2006 12:32 PM - fgudin

Description

omshell should reference man pages dhclient and dhcpd in section 8, not 1.

Attached patches include a diff to src/usr.sbin/dhcp/dhcpctl/Makefile.bin (adding a PATCHES= entry) and the patch itself ("omshell.1.patch"). I hope it's the right way to do it.

History

#1 - 01/06/2007 07:30 PM - fgudin

Hello,

I opened both issues ([#413](#) and [#414](#)) through the web UI: IIRC, I uploaded this file just after the initial post, because I could only attach one file at a time.

I tried to check it out, but bugs. seems down right now.

In case I'm wrong, I could resend it but not before January 3rd: this file is on my work PC, which I've no access to from home, sadly.

I'll take the opportunity of this post to wish everybody here an Happy New Year ! (even if it's a bit too soon, localtime is 22:00)

Francis.

#2 - 01/06/2007 07:30 PM - dillon

:omshell should reference man pages dhclient and dhcpd in section 8, not 1.

:

:Attached patches include a diff to src/usr.sbin/dhcp/dhcpctl/Makefile.bin
:(adding a PATCHES=3D entry) and the patch itself ("omshell.1.patch"). I hop=
:e it's
:the right way to do it.

The omshell.1.patch file is missing from your submission :-)

-Matt

#3 - 01/09/2007 04:13 PM - justin

Bugs.dragonflybsd.org is back up and the patch is attached there; is this OK to commit? (I'm unfamiliar with the changes made.)
